Ultimate, we have created a totally unique look and feel for Video Editing software, photo manipulation, and VFX to bring this latest version of the Pinnacle Studio software to.1. Field of the Invention This invention relates to a heat insulating container used for storing a beverage in a refrigerator or the like, and more particularly, to a construction of the heat insulating container, in which a non-expandable insulating material is used to heat insulate the container. 2. Description of the Related Art A refrigerator is a device for storing food by using an inner temperature below zero degrees centigrade. The refrigerator can keep food fresh at a low temperature for a long time. A refrigerator using an air conditioner or the like as a heat source to keep the inner temperature below zero degrees centigrade may only keep food fresh for a few days because the air conditioner or the like cannot supply heat for a long time. Therefore, a refrigerator using a heat pipe has been developed and is known in the art. A heat insulating container is used for storing a beverage in a refrigerator. A non-expandable insulating material, for example, a powdery polyurethane foam is used as an insulating material. The non-expandable insulating material is injected in a storage
